

Copper looks fantastic, but who has time to polish it, especially in a restaurant? Colors and decor need continual restoration and maintenance. What downtime?

Nyalic has an innovative process for maintaining the glowing patina of copper.

Using Nyalic cleaners and techniques, followed with a Nyalic clear surface protectant application, copper can be restored and maintained. The applied Nyalic coat has not only made the copper glow, it delivers a low maintenance and cost effective finish. And as with other clients, your staff will be pleased that no ongoing polishing is involved.

A freshened image provided by Nyalic lets you always look your best.

Good solution. Simple, quick, effective and with limited downtime.

Nyalic protects and seals metal surfaces to prevent corrosion and staining. It remains clear and does not yellow. Nyalic resists dirt and repels water. Nyalic self-levels for easy repair and reduces high maintenance costs caused by corrosion.

Available in aerosol cans for on-site repair.

Nyalic[®] ...clearly better protection[™].
